

Product Guide

Hand protection for **every hazard**

Suppe

Why Superior Glove

Protection workers want to wear

Workers shouldn't have to choose between comfort and safety. We innovate to fit the protection they need into comfortable safety gloves and other PPE they'll want to wear.

North American Innovation

We research, design, and test our products at our Canadian headquarters to ensure safety, effectiveness, and quality.

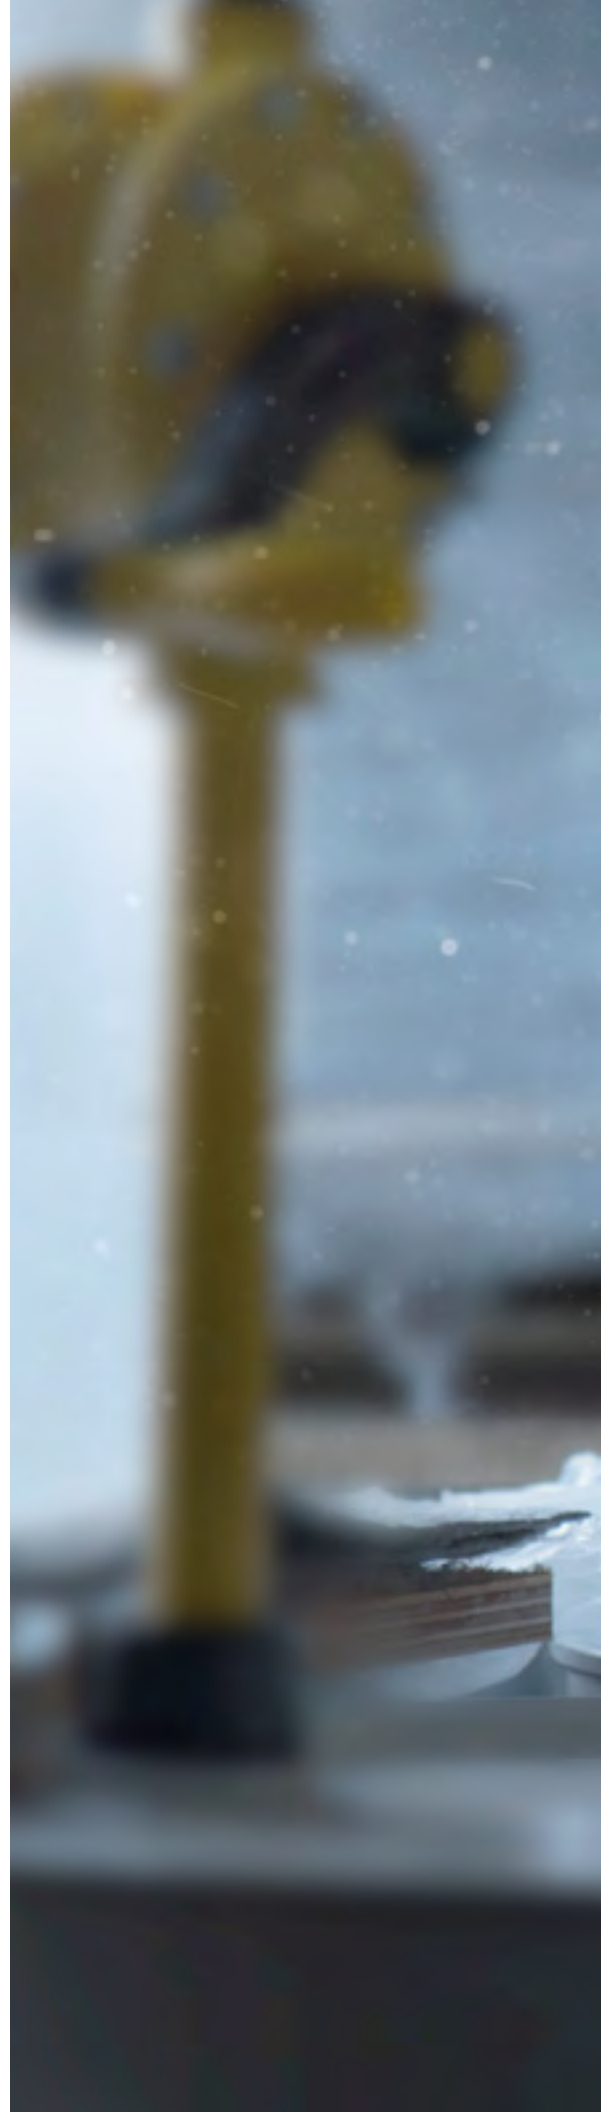

Injury reduction education and training

We offer free resources and services to help companies develop safety programs that eliminate and reduce injuries through non-PPE changes that minimize workplace hazards and improve safety culture.

Extreme Cut

What you need to know about extreme cut protection

Gloves and sleeves that provide extreme cut resistance are designed for tasks such as meat processing, industrial blade maintenance and changing, pulp and paper maintenance, glass manufacturing, heavy metal stamping, and glass installation.

When looking for extreme cut protection levels on gloves, look for the following ANSI cut levels represented by the following icons:

Extreme Cut Protection Level A9

TENACTIV™ S21TXUFN | 5 - 12

World's thinnest silicone-free maximum cut protection

The world's thinnest gloves to deliver the industry's highest-level of cut protection for the most hand dexterity and sense of touch. It also features ultra-thin nitrile palm coating for better wet grip and are touchscreen compatible.

ANSI
Probe

CFIA FDA

EXTREME CUT PROTECTION | LEVEL A9

Featuring the industry's maximum cut resistance

CONTENDER™ SKGCXPS | XS - 2XL

Silicone-free maximum cut protection for tasks that don't require extra grip

TENACTIV™ S13TAWFN | 6 - 12

Maximum cut protection with foam nitrile palm coating for better wet grip

TENACTIV™ STAGCXPU | 5 - 12

Maximum cut protection with palm coating for better dry grip and touch sensitivity

TENACTIV™ STAGLXPB | 6 - 11

Maximum cut and hypodermic puncture protection with latex palm coating for grip

ENDURA® 378CXGOB | S - 3XL

Maximum cut-resistant leather gloves that resist water and oil penetration

ENDURA® 378GCXVB | S - 3XL

Maximum cut-resistant leather gloves that resist water and oil penetration with back-of-hand impact protection

TENACTIV™ S18TXFTLP | 7 - 11

Level A6 high cut-resistant gloves with Level A9 maximum cut protection leather palm patch and exposed finger and thumb for touch sensitivity

SUPERIOR® MMG | 2XS - 2XL

Food safe stainless steel chainmail gloves with maximum cut protection

CFIA FDA

TENACTIV™ KPSTA | S - 2XL

Food safe sleeves with maximum cut protection and inner bicep elastic and grip to stay in place

14", 18", tubular cut

Extreme Cut Protection

Level A8 & A7

TENACTIV™ SBTAKLP | S - 2XL

Reinforced with leather palms for durability

TENACTIV™ STACXPNRT | 5 - 12

Non-marring micropore palm coating for better wet grip plus touchscreen compatibility

TENACTIV™ STXPNRVB | 5 - 12

Orange hi-viz impact protection plus micropore palm coating for better wet grip

EXTREME CUT PROTECTION | LEVEL A8 & A7

Food Safe String Knit

Washable, bleachable, and pre-shrunk to maintain size. Antimicrobial with blue yarn for better contamination detection.

SURE KNIT™ S10SXB | XS - 2XL

Thicker for more cushioning

SURE KNIT™ S10SXBDB | XS - XL

Added patches for deboning protection

SURE KNIT™ SLSXB | M - XL

Food safe antimicrobial sleeves with extreme cut protection and inner bicep elastic and grip to stay in place

9", 18", 21", 24", tubular cut, available with or without thumbhole

Color-coded extreme cut protection

Food safe and color-coded gloves for allocation to different areas in food processing plants to help prevent cross contamination. Antimicrobial with extreme cut resistance and 360° cut protection.

High Cut

What you need to know about high cut protection

Gloves and sleeves that provide high cut resistance are designed for tasks such as oil & gas drilling and processing, automotive and aerospace manufacturing/assembly, HVAC manufacturing, recycling sorting, and metal stamping.

When looking for high cut protection levels on gloves, look for the following ANSI cut levels represented by the following icons:

High Cut Protection String Knit

HIGH CUT PROTECTION | STRING KNIT

With Palm Coating

TENACTIV™ STAGPN | 5 - 12

With micropore nitrile palm coating for better wet grip

TENACTIV™ STAGHVPN | 5 - 12

Hi-viz with micropore nitrile palm coating for better wet grip

EMERALD CX® SCXPNTFC | 6 - 11

With micropore nitrile double-coating for use in wet and oily conditions that don't involve full submersion

EMERALD CX® S13CXPNT | 6 - 11

Silicone-free gloves with heat protection up to 140°C or 284°F plus micropore nitrile palm coating for better wet grip

TENACTIV™ STAGPNVPI | 6 - 12

Padded palms for vibration dampening and comfort plus micropore nitrile palm coating for better wet grip

TENACTIV™ S13TAXFN | 6 - 12

Everyday 13-gauge knit gloves with foam nitrile palm coating for better wet grip

EMERALD CX® S10NXFN | 5 - 12

Silicone-free with foam nitrile palm coating for better wet grip

EMERALD CX® S10NXFNL | 5 - 11

Extra comfort 10-gauge knit gloves with reinforced thumb crotch for durability plus foam nitrile palm coating for better wet grip

TENACTIV™ S18TAXFN | 6 - 12

Hi-viz ultra-thin gloves with excellent sense of touch and foam nitrile palm coating for better wet grip

TENACTIV™ STAGCTPU | 6 - 10

High cut-resistant gloves that tear away if caught in fast-moving rotational equipment to avoid hazardous snags plus polyurethane palm coating for better dry grip

TENACTIV™ STAGXPU | 5 - 12

Softer and more comfortable everyday 13-gauge gloves with polyurethane palm coating for better dry grip

TENACTIV™ STAFGPU | 5 - 12

More durable everyday 13-gauge gloves with polyurethane palm coating for better dry grip

TENACTIV™ STAGHVPU | 5 - 12

Hi-viz with polyurethane palm coating for better dry grip and touch sensitivity

TENACTIV™ STACKXPURT | 5 - 12

Maximum abrasion resistance with reinforced thumb crotch for high durability plus polyurethane palm coating for better dry grip

DEXTERITY® S10LXPB | 6 - 11

Food safe with maximum hypodermic puncture protection and latex palm coating for grip

Puncture

What you need to know about puncture protection

Puncture-resistant gloves and sleeves prevent injuries caused by pointed objects that penetrate the skin. There are two ANSI standards for puncture protection: hypodermic puncture and probe puncture.

Hypodermic puncture protects against injuries from objects that can easily penetrate the skin such as syringes, fine wood splinters, tiny pieces of glass, thin gauge wire, construction staples, and other hypodermic hazards.

A probe puncture injury is more blunt and can be as thick as a ball-point pen. This includes injuries from objects such as nails, thick cables, wood splinters, wires, and other hazards.

The following gloves offer hypodermic protection and the industry's maximum probe puncture protection. When looking for puncture protection levels on gloves, look for the following icons:

ASTM F2878
Hypodermic

Fire Resistant

What you need to know about fire resistance

Fire resistant (FR) material is designed to protect workers from flash fire and electric arc hazards. FR items are either treated to resist flame or made from materials that are inherently fire resistant.

Our FR products are third-party tested to ensure compliance with industry standards. When looking for FR garments, look for the following icons:

ARC FLASH
4 cal/cm²

ARC FLASH
8 cal/cm²

ARC FLASH
25 cal/cm²

ARC FLASH
40 cal/cm²

Fire Resistant Multi-Hazard Protection

ENDURA® 378GKG4P | S - 3XL

Premium leather FR gloves that feature maximum impact protection, high cut resistance, and arc flash protection. Treated with Oilbloc™, they resist water and oil penetration that can degrade the material and present safety issues. Padded palms provide vibration dampening and enhance comfort.

Supera[™] FR Essentials

Supera[™] FR Essentials include accessories, base layers, and other everyday apparel designed to be comfortable for all-day wear.

Headgear

SUPERA™ FR BAKVFR

Fire-Resistant Balaclava

SUPERA™ FR WCKVFR

Fire-Resistant Watch Cap

SUPERA™ FR NWKVFR

Fire-Resistant Neck Gaiter

Key Features

- Ultra-soft feel for unbeatable all-day wear without irritation
- Color: gray

Inherent FR

- Made with two-layer Kermel®-viscose blend that feels soft next to skin
- Won't wash out or wear off
- Maintains original FR protection level for life of product

Dual-Hazard Protection

- Flash fire rated: NFPA 2112
- Electric arc rated: Cat 2 NFPA 70E (16 cal / cm2)

Available Sizes

- One Size

Base Layers

SUPERA™ FR TSKVFR

Fire-Resistant Long Sleeve Underlayer Shirt

SUPERA™ FR LJKVFR

Fire-Resistant Underlayer Pants

Key Features

- Ultra-soft feel for unbeatable all-day wear without irritation
- Color: gray

Inherent FR

- Made with two-layer Kermel®-viscose blend that feels soft next to skin
- Won't wash out or wear off
- Maintains original FR protection level for life of product

Dual-Hazard Protection

- Flash fire rated: NFPA 2112
- Electric arc rated: Cat 2 NFPA 70E (6.1 cal / cm2)

Available Sizes

- S - 3XL

Fire Resistant Supera™ FR Classic

Supera™ FR Classic products are made from 7-ounce or 9-ounce fabric that is treated to provide dual-hazard protection against fire and arc flash hazards.

Key Features

- FR treated 88% cotton / 12% nylon fabric
- 7oz or 9 oz fabric
- Critical stress points reinforced for long, reliable wear

Dual-Hazard Protection

- Flash fire rated: NFPA 2112
- Electric arc rated: Cat 2 NFPA 70E (11 cal / cm²)

SUPERA™ FR FR310PTH / FR310PT

Fire-Resistant Pants

Key Features

- Heavy duty 9 oz fabric
- Front closure: melamine button with UL NFPA 2112 certified FR zipper
- Storage: 2 side pockets, 2 cargo pockets with flap and Velcro closures, and 2 back patch pockets
- 7 belt loops plus 1 loop for glove clip on front waist belt
- Reflective tape on legs for better visibility
- Available in hemmed (FR310PTH) and unhemmed (FR310PT)

Available Sizes

- Regular
28x32, 30x32, 32x32, 34x32, 36x32, 38x32, 40x32, 42x32, 44x32, 46x32
- Tall
34x36, 36x36, 38x36, 40x36, 42x36, 44x36, 46x36

SUPERA™ FR FR240X2COBE

Fire-Resistant Royal-Blue Coveralls

Key Features

- 7 oz fabric
- Hi-viz criss-cross back
- FR mesh vented back for added cooling
- Front closure: UL NFPA 2112 certified FR zipper and 2 snaps
- Storage: 2 chest pockets, 2 tools pockets all with flaps and Velcro closures, 2 side pockets, 2 back pockets, and 2 pass-through pockets
- Gas detector loops on both sides of the chest
- Velcro closures on arm and leg cuffs

Available Sizes

- Regular
36X30, 38X30, 40X30, 42X30, 44X30, 46X30, 48X30, 50X30, 52X30, 54X30, 56X30, 58X30, 60X30
- Tall

Fire Resistant Supera™ FR Classic With Stretch

Supera™ FR Classic with Stretch products are made from flexible 7-ounce fabric that is treated to provide dual-hazard protection against fire and arc flash hazards. We've added stretch to make these items more comfortable for everyday tasks.

Key Features

- FR treated 85% cotton / 8% nylon / 6% elastane / 1% anti-static
- Flexible 7 oz fabric with stretch
- Critical stress points reinforced for long, reliable wear

Dual-Hazard Protection

- Flash fire rated: NFPA 2112
- Electric arc rated: Cat 2 NFPA 70E (11 cal / cm²)

SUPERA™ FR FR240CO / FR240CON

Fire-Resistant Navy-Blue Coveralls

Key Features

- Flexible 7 oz fabric
- FR mesh vented back for added cooling
- Front closure: UL NFPA 2112 certified FR zipper and 2 snaps
- Storage: 2 chest pockets, 2 tools pockets all with flaps and Velcro closures, 2 side pockets, and 2 back pockets
- Gas detector loops on both sides of the chest
- Velcro closures on arm and leg cuffs
- Available with reflective tape (FR240CO) and without (FR240CON)

Available Sizes

- Regular
36X30, 38X30, 40X30, 42X30, 44X30, 46X30, 48X30, 50X30, 52X30, 54X30, 56X30, 58X30, 60X30

supera
FR

Fire Resistant Supera™ FR Ultra Lightweight

Supera™ Ultra Lightweight products are made with 5.5-ounce fabric that provides dual-hazard protection against fire and arc flash. The breathable ultra lightweight material wicks away sweat and helps it evaporate, facilitating the body's natural cooling process. The inherently fire-resistant material provides protection that won't wash or wear out for the useful life of the garment.

Key Features

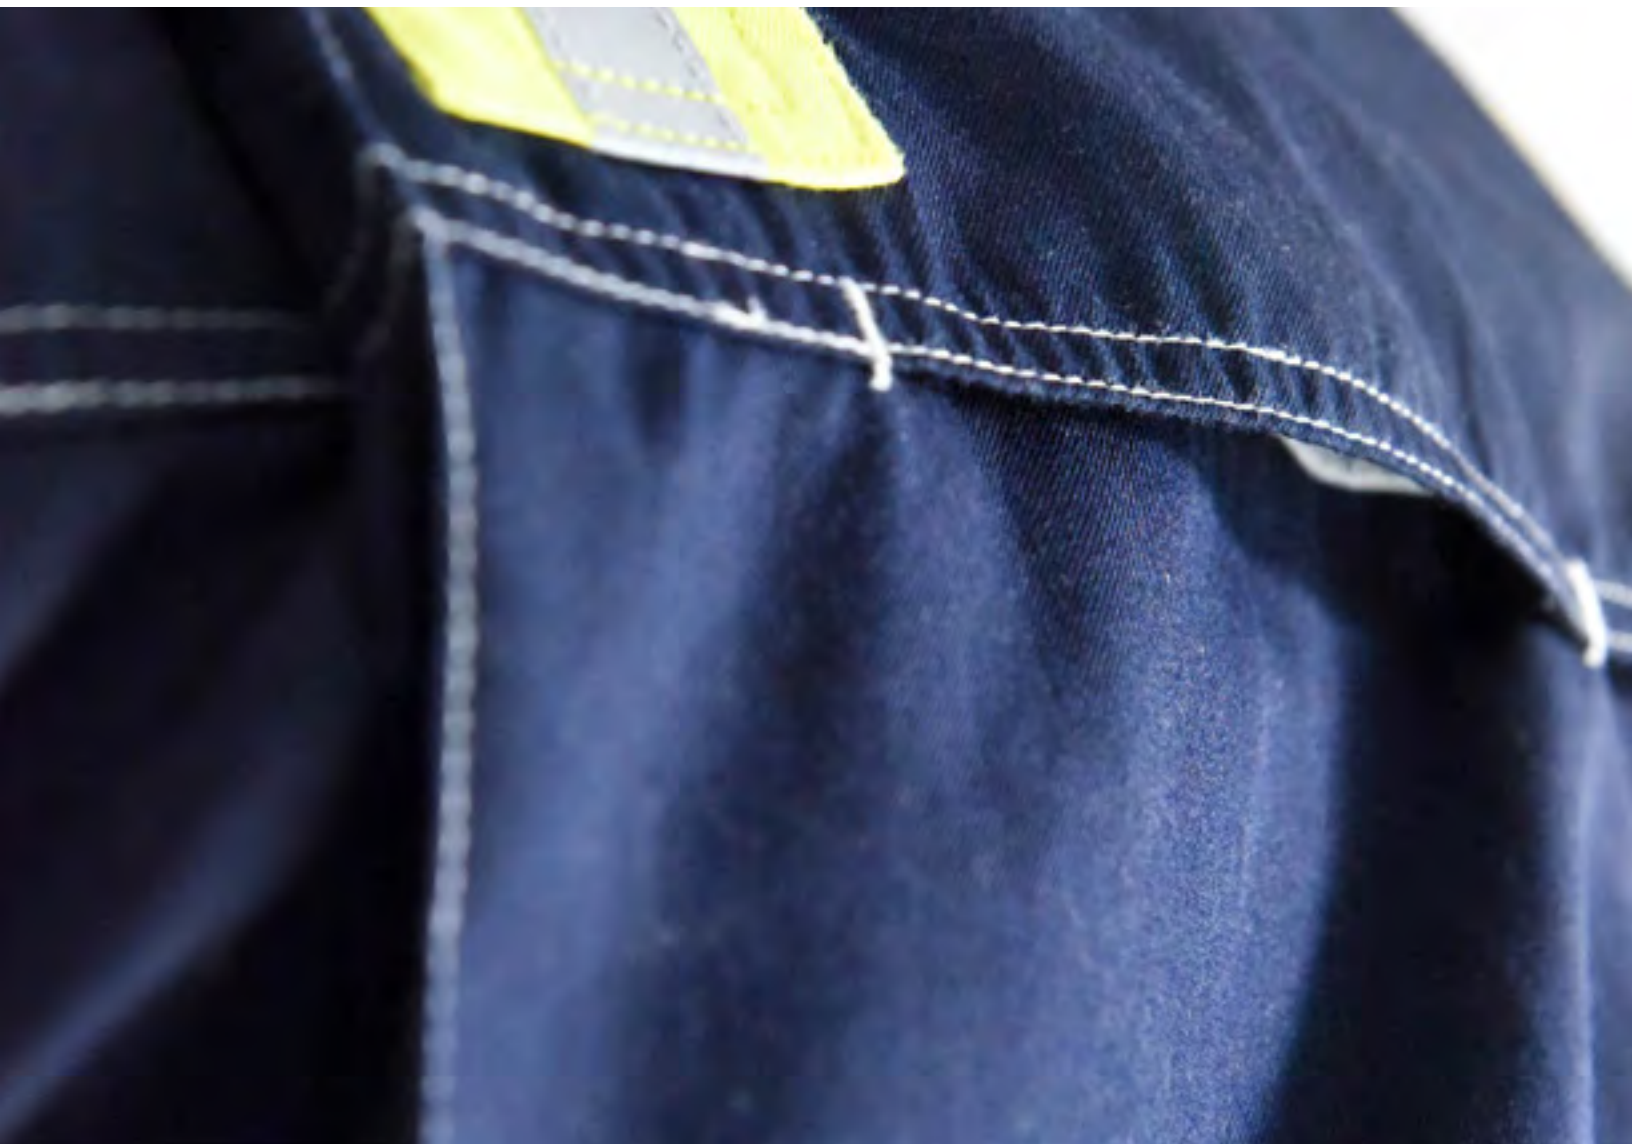

- Ultra lightweight 5.5 oz fabric that is inherently fire resistant
- Critical stress points reinforced for long, reliable wear

Dual-Hazard Protection

- Flash fire rated: NFPA 2112
- Electric arc rated: Cat 2 NFPA 70E (10 cal / cm2)

Inherent FR

- Made with 65% FR viscose / 25% MetaActiv™ / 8% ParaActiv™ / 2% anti-static
- Won't wash out or wear off
- Maintains original FR protection level for life of product

SUPERA™ FR FR180CO

Fire-Resistant Navy-Blue Coveralls

Heat

What you need to know about heat protection

Heat-resistant gloves and sleeves protect against burn injuries when working with hot objects or surfaces.

When looking for heat protection levels on gloves, ANSI heat levels protect up to the following temperatures:

HEAT

PROTECTION UP TO
80°C / 176°F

HEAT

PROTECTION UP TO
140°C / 284°F

HEAT

PROTECTION UP TO
200°C / 392°F

HEAT

PROTECTION UP TO
260°C / 500°F

HEAT

PROTECTION UP TO
320°C / 608°F

Heat Protection Level 5

HEAT PROTECTION | LEVEL 5

Gloves Featuring The Industry's Maximum Heat Protection

COOL GRIP® TRGSS | S/M, L/XL

With adhesive-resistant silicone palm strips plus extended 4" cuffs for wrist safety

COOL GRIP® SPFGSS | S / M, L / XL

Low cut protection with adhesive-resistant silicone palm strips

COOL GRIP® SCPSCLP | XS - XL

Low cut protection with leather palms for durability and comfort

 WARNING: Known to the State of California to cause cancer, birth defects, or other reproductive harm. For more information, go to P65warnings.ca.gov

COOL GRIP® SKPX/PSS | S / M, L / XL

Moderate cut protection with adhesive-resistant silicone palm strips

DRAGON™ K825KP | L, XL

Moderate cut protection with comfort liner made from wool and cotton

COOL GRIP® SKX-W | S - 2XL

Wool-lined for added comfort plus moderate cut protection

COOL GRIP® SPGC/A | S - 2XL

With synthetic lining for added comfort plus moderate cut protection

COOL GRIP® SKX-W4 | S - XL

Cut resistant with a thicker 7-gauge knit for more cushioning and increased durability plus knit wool liner and extended 4" cuffs for wrist safety

DRAGON™ TK835LG2 | S, L

High cut protection with extended 4" leather cuffs for wrist safety

CONTENDER™ TRFGK | XS - XL

High cut protection and durability with better grip in wet conditions

COOL GRIP® TBMOB | ONE SIZE

Heavyweight cotton baker's mitts that are fully lined for extra comfort and insulation and can resist temperatures up to 320°C / 608°F

Double-layered cut-resistant sleeves with ANSI 2 heat protection and inner bicep elastic and grip to stay in place
22", tubular cut

ENDURA® WJ30 | M - 3XL

Full coverage welding jacket for all-day protection

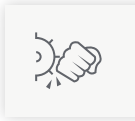

Designed for long periods of welding in busy environments to protect workers from sparks, slag, and heat. Sewn with heat resistant thread to prevent seams from burning out and to extend product life. Flip-up collar offers added protection to the neck while premium goatgrain leather sleeves increase comfort and flexibility and reduce jacket weight.

Abrasion

What you need to know about maximum abrasion protection

Abrasion-resistant gloves offer the industry's maximum durability against scrapes and friction which can degrade the material and present safety issues.

ANSI abrasion level 6 is the highest level which is the only included in this section. When looking for abrasion level, look for the following icons:

ABRASION

ABRASION

ABRASION

ABRASION

chemical

What you need to know about chemical protection

Chemical gloves are made with materials that resist liquids and fluids as well as chemical degradation.

The best way to choose the right gloves is to identify the chemical being handled and match it to the glove material that resists that chemical. For this, you can ask an expert or consult your chemical SDS (safety data sheet).

- Increase worker productivity
- Build an effective hand safety program

Water Protection

What you need to know about waterproofing

Waterproof materials create a barrier to keep liquids out and prevent penetration. This allows workers to stay comfortable and dry in wet working conditions.

When looking for waterproof gloves, look for following icon:

WATERPROOF

Water Protection String Knit

**TENACTIV™ S18WTFN | 6 - 12**

Cut resistant with foam nitrile palm coating for better wet grip

**TENACTIV™ S18WTLFN | 6 - 12**

Cut-resistant gloves with cold protection plus foam nitrile palm coating for better wet grip

**TENACTIV™ STXWPNVB | 6 - 12**

High cut-resistant waterproof and windproof gloves with impact protection and micropore nitrile palm coating for better wet grip

**EMERALD CX® SCXPNTFC | 6 - 11**

Double-coated cut-resistant gloves with micropore nitrile for wet and oily tasks that don't involve full submersion

ENDURA® 378KMT4P | XS - 3XL

Cold-rated multi-hazard protection with maximum impact resistance

These premium leather gloves offer the industry's maximum Level 3 impact resistance and high cut protection. They also feature vibration-dampening padded palms and are treated with Oilbloc™ which resists oil penetration that can degrade the material and present safety issues.

Disposable

What you need to know about disposable protection

Disposable protection is ideal for single use to prevent cross-contamination.

When looking for food safe disposable protection, look for the following icons:

CFIA Canadian Food Inspection Agency compliant

FDA Food and Drug Administration compliant

If you are looking for disposable protection for medical use, products must be approved as Class II Medical Devices by Health Canada for Canadian products and the FDA for use in the USA. Look for products marked “Medical Grade” or “for medical use.”

Products marked as “Industrial Grade” or “industrial use only” are not suitable for medical use.

Disposable Food Safe

KEEPKLEEN® RDNMD | XS - XL

- Have fewer and less severe injuries
- Lower both injury and PPE costs
- Increase worker productivity
- Build an effective hand safety program

Additional Resources

GLOVE SIZING GUIDE

A proper fit is extremely important. An uncomfortable fit causes hand fatigue and ultimately could lead to a potential workplace hazard.

Measure the width of your hand from the base of your first finger and across your knuckles.

5 / 2XS	50 mm / 2 inches	9 / L	101 mm / 4 inches
6 / XS	63 mm / 2.5 inches	10 / XL	113 mm / 4.5 inches
7 / S	75 mm / 3 inches	11 / 2XL	126 mm / 5 inches
8 / M	88 mm / 3.5 inches	12 / 3XL	140 mm / 5.5 inches

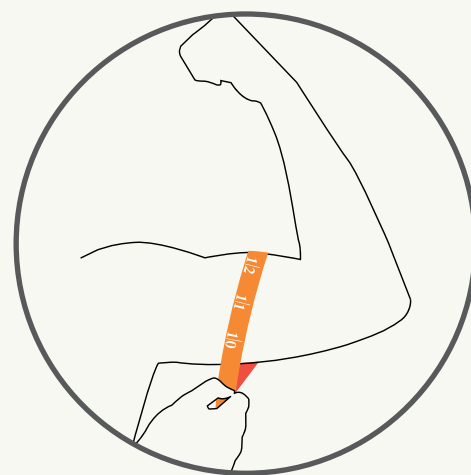

SLEEVE SIZING GUIDE

To find the best fit, measure the circumference of your bicep and choose sizing according to the chart below.

Sleeves come in multiple lengths.

2XS	250 mm / 9.75 inches	L	295 mm / 11.75 inches
XS	260 mm / 10.25 inches	XL	370 mm / 14.5 inches
S	265 mm / 10.5 inches	2XL	450 mm / 17.5 inches
M	280 mm / 11 inches		

For a more natural fit, sleeves come in a tapered version which provide better comfort and staying power. Tapered sleeves are designed to fit the contours of your arm and won't lose shape due to stretching
